Active Corporate Wear

MADE WITH SPORTS DNA.

We make people move at gyms, tracks and courts. On slopes and forest trails. And in workplaces all over the world. Our Active Corporate Wear collection is inspired by everything we've learned from making functional garments for the world's greatest athletes. Bringing fit, durability and breathability to the modern workplace, our clothes are designed to make the most out of office hours and beyond. Inspiring co-workers to take the stairs more often, schedule more meetings outside and make exercise a part of the daily routine. Studies show that active workplaces enjoy higher productivity, happier employees and fewer sick days. So don't be surprised if the next quarterly report goes one step further.

Introducing Wildcard

Wildcard comprises attractive surplus items that continue to be in demand and that will be offered as long as stock lasts. These surplus treasures encompass a diverse range of products across our categories, carrying their own unique appeal. Featuring cutting-edge technologies and materials that enhance performance and optimize comfort, this ever-moving product range provides athletes with a continuously renewed chance — a wild card — to improve and reach their goals.

Outdoor

Our Outdoor range allows you to experience everyday adventures with great confidence. This comprehensive collection includes items that protect against the elements, offering excellent comfort during casual excursions.

This warm and functional jacket features lightweight and blown-in polyester insulation that provides remarkable warmth, effectively trapping body heat to keep you warm and cozy in chilly conditions. The polyester filling is highly functional and quick drying, minimizing discomfort from sweat or unexpected rain. Its lightweight nature also means it can be compressed into a small pouch or backpack, allowing for quick on-the-go adjustment to rapid temperature drops. The jacket also features detachable hood, chest zip pocket, and two side zip pockets for secure storage of essentials such as key, phone, and energy bar. Whether you're exploring the backcountry or simply navigating your daily routine, this jacket is a reliable choice for staying warm and protected in various outdoor environments. Highly versatile, it works perfectly for layering in cold conditions or as a standalone garment on milder days.

ADV Explore Power Fleece Hood Jkt (ADV)

ADV Explore Power fleece Hood Jacket is a stretchy and highly functional fleece jacket that makes a versatile and essential addition to any outdoor enthusiast's wardrobe. This advanced hood jacket is made of a stretchy fleece material with exceptional warmth retention and breathability properties.

The fleece material traps heat close to the body while allowing moisture and sweat to escape, ensuring you stay warm, dry and comfortable during outdoor activities in cold conditions. In addition, the stretchy material provides excellent freedom of movement. Whether you're hiking, skiing, or engaging in any outdoor activity, the jacket moves with you, ensuring you can easily bend, twist, and reach without any restriction. The jacket also features two zip pockets that provide convenient storage for essentials like keys, phone and snacks. A perfect choice for a wide range of activities — from hiking and skiing to everyday wear during chilly seasons – the jacket can be worn both as a mid-layer and an outer layer.

Material: 94% Polyester-Recycled, 6% Elastane

SUPER-SOFT AND STRETCHY FLEECE FABRIC WITH BRUSHED INSIDE (250 GSM)

Footwear

Standing, walking and running are part of everyday life, whether you're at work, out for a run, or strolling downtown. Our footwear range is designed for those who are on their feet for long periods, providing comfort, support, and durability — all day.

Pacer

MEN	1915025	EU 39 ½-47, UK6-UK12
WOMEN	1915026	EU 35 ½-42, UK3-UK8

Introducing the Pacer, our most comfortable performance running shoe that provides exceptional bounce and stability for a smooth and speedy ride.

An advanced performance running shoe that features a softer version of the successful Px Foam™ in the midsole, Pacer delivers a stable, smooth, and responsive ride with explosive rebound − perfect for speed training and every day running. Its lightweight construction provides a bouncy, energetic experience that propels you forward with each stride, while its minimal outsole design with hexagon lug pattern offers superior road traction for a secure grip on various surfaces. In addition, the upper is made from a lightweight and breathable material that provides a snug and stable fit. A sleek design and lightweight feel make the Pacer an ideal choice for runners seeking a fast, nimble shoe that won't weigh you down.

Px Foam™

Px Foam™ is an ultra-lightweight midsole material that offers an exceptionally high amount of energy return while providing shock-resistance and flexibility. A single, natural foaming agent is used in making this innovation without adding any chemical cross-linking agents. In addition, raw and finished materials are completely reusable. The innovative foam has an extremely low density making it up to 20% lighter than traditional EVA. The reduced weight combined with explosive rebound make Px Foam™ perfect for every run.

Material: Upper: 39% Polyester, 39% Polyester-Recycled, 10% Thermoplastic urethanes, 12% Polyurethane. Midsole: 100% ETPU Foam. Outsole: 100% Rubber

V150 Engineered

MEN	1908265	EU 391/2-501/2, UK 6-15
WOMEN	1908264	EU 35½-42, UK 3-8

Mid-distance road-running shoe that offers excellent flex and support, which makes it a great choice also for speed intervals and longer runs.

Designed for the 10k run, V150 Engineered comes with a fully engineered mesh upper for optimal freedom of movement, comfort and performance. V Energy Foam in the midsole's forefoot area provides high-caliber energy return, elevating your stride and giving that extra push to help you reach your goals. The shoe is built on a last design that follows the natural contours of the foot and comes with flexibility in the right areas to allow the foot muscles to work and perform as they are intended to. Furthermore, V150 Engineered features neutral stability to offer the right level of motion control for runners with normal pronation or a neutral foot movement.

Material: Upper Mesh: 60% Polyester 40% Polyamid; Insole: EVA with single mesh; Lining: 100% Polyester;

Base Layer

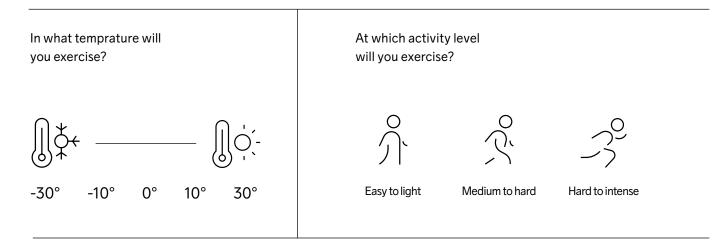

Craft is a pioneer in performance base layer and offers functional garments that provide excellent body-temperature management during exercise in any condition. The fabric structures and knitting techniques interact to efficiently transport moisture away from the skin and distribute it on the outside — enabling you to perform optimally.

Dry	
Warm	
Wool	
Underwear	

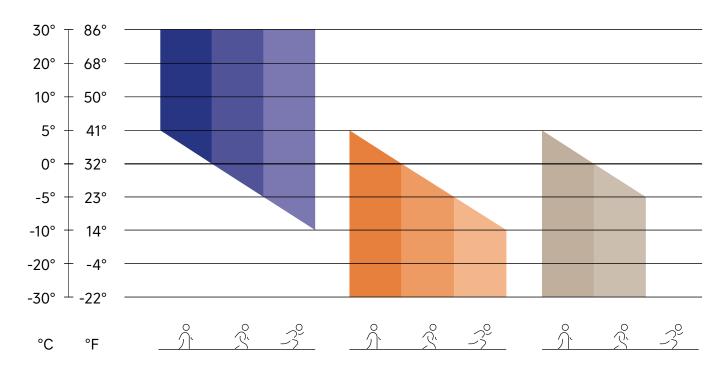

SEGMENTS

Craft Temperature Control System

Match your temperature with your activitly level to find the right king of base layer.

Dry is our super-efficient base layers made from synthetic fibers that help you stay dry during intense workouts in warmer temperatures. Contrary to popular belief, a base layer is always a good idea, even if the thermometer is showing red.

This is what you want if you plan on working out when it's cold. These base layers are made of the best of best when it comes to synthetic fibers, keeping you both warm and dry, no matter if you're going for a new PB or just taking a walk in the park.

Wool. You either love it or hate it. This base layer collection is based on natural fibers and keeps you warm in really cold conditions, even when wet. The garments are super versatile and work just as well for high-intensity training, especially since the material has odor-resistant qualities!

Some products really stands the test of time. And through the years they have become true classics that you will always find in our range.

CRAFT CIRCLE

RUNNING IN CIRCLES IS THE ONLY WAY FORWARD.

Craft Circle is our sustainability initiative. It is an integral thread that runs through everything we do, from design to delivery and beyond. Its purpose is simple: to promote conscious choices that minimize the environmental impact of our products.

Our initiative is aligned with six of the United Nations' Sustainable Development Goals (SDGs) from the 2030 Agenda, selected for their relevance to our business and where we can make the greatest impact. These six goals guide how we design, produce, and distribute our products, how we extend their lifecycle through circular solutions, and how we collaborate with partners and organizations for a more sustainable future. The goals have inspired us as a company and a brand to set our own ambitious climate targets for the future.

By 2030, our aim is to reduce carbon emissions from our total operations by 50% compared to our base year of 2021. To achieve this, one key step is ensuring all Craft products are made from more preferred materials (e.g., recycled materials) and using more sustainable production methods. Currently, 75% of our products are fully or partially made from more preferred fibers.

You don't just buy a Craft product - you invest in it

We design for the long run for one simple reason: the longer a product serves its purpose, the lower its environmental impact.

For us, this means creating functional and innovative products that serve a clear purpose, made from durable, sustainable materials, and manufactured to high-quality standards to ensure extended use and recyclability. As part of this process, we've developed our Craft design principles and introduced the Lifetime Guarantee program for our base layers.

Want to know more about our sustainability initiative? Learn more at *craftofscandinavia.se/en/about-us/sustainability*

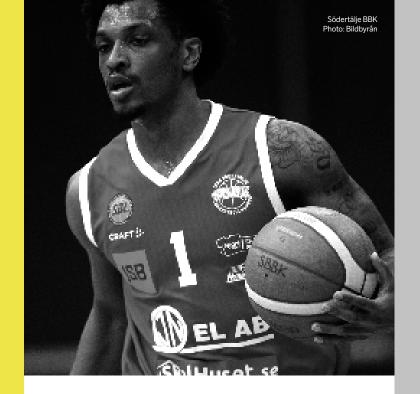

TEAMWEAR

For world champions and everyday heroes

Craft athletes work out for freedom, for happiness and for progress — to improve quality of life. We are people of all ages and genders who prioritize physical movement and appreciate design and functionality. We are all athletes, from the everyday active to the world record holder.

Branded fabrics & features

VentAir represents the latest in cutting-edge fabric systems. It's a highly advanced system that offers water and wind protection in combination with excellent ventilation and moisture transport. The system includes three fabric categories with unique characteristics for unique demands.

VENTAIR"X

Fabric that provides excellent water protection, ventilation and comfort for a wide range of sports. The dedicated athlete's choice.

VENT∧IR X wind

Fabric that offers excellent wind protection, ventilation and comfort In windy conditions.

The V-series shoes feature a Vibram Megagrip 3 mm rubber outsole for excellent grip on rock and stone. Excellent grip on slippery surfaces. Gravel-free design. Self-cleaning lugs. V Flex design for natural flexibility.

Infinity Pad

Density: 80 kg

Thickness: Seat and front: 12 mm Side: 3 mm

Women

Men

This high performance fabric contains COOLMAX® fibre, which helps transport moisture away from the body to the outer fabric layer, keeping you cool and dry during intense exercise in warm conditions.

STANDARD 100 by OEKO-TEX $\!\!^{\odot}$ is one of the world's best-known labels for textiles tested for harmful substances. It stands for customer confidence and high product safety.

The SEAQUAL™ Initiative challenges Plastic Pollution and helps to clean our oceans from marine litter, driving society towards circularity. The SEAQUAL™ Initiative is a unique collaborative model involving NGO's, Fishermen, Local Communities, Researchers, Scientists, Authorities and Private Stakeholders to clean the Ocean floor and surface, rivers and estuaries, beaches and coastline.

The Craft Principle

An intensive training session will result in the body producing a considerable amount of sweat. This is just how it should be and a confirmation that you are pushing your limits. If you are not wearing functional clothes, the sweat will remain in place and block the pores, causing your body heat to rise. Eventually the clothes will turn into a damp, cold and heavy "envelope", relentlessly hampering your performance. If you are wearing functional clothes, however, the skin will stay dry and you will be able to perform at an ideal working temperature. Craft's functional clothes, in up to three layers, create a perfect microclimate and provide the basis for optimal performance. Each layer is equally important and complements the rest of the chain.

Base Layer

Base layer that efficiently transports moisture away from the skin and distributes it on the outside of the garment, where it either evaporates or is passed on to the next layer. For optimal performance and comfort, craft base layer should always be worn underneath your outer layers, regardless of weather conditions.

Midlayer

Craft midlayer provides insulation and warmth while transporting moisture and excess heat to the next layer or into the surrounding air. When the thermometer creeps downward, this layer enables you to retain valuable body heat without reducing your freedom of movement.

Protection Layer

The third and outermost layer is your shield against the elements and provides comfort and performance no matter the conditions. Transcending the laws of logic, craft protection layer protects against rain, wind and cold at the same time as it releases surplus heat and moisture from the layers underneath.

Wash instructions

Follow the care instructions to extend the function, shape and lifespan of the garment.

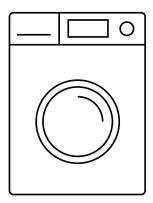

General advice

Taking good care of your garment results in better function and protection, allowing you to focus on your training. Don't wash your functional garment more often than necessary; it saves both the clothes and the environment.

Follow the instructions on the product's care label and use an environment-friendly detergent (dose carefully).

To ensure that your garment maintains its shape and to avoid wear and tear, always close zippers, Velcro openings, buckles and buttons before washing.

Don't use fabric softener when washing functional clothes. Softener encapsulates the fibers and thus ruins the fabric's ability to transport moisture.

Material-specific advice

POLYESTER

Wash with similar colors. Clothes with prints should always be washed inside out. Remove the garments from the washing machine immediately after finishing washing. Line dry the garments, preferably in a drying cabinet. Do not tumble dry; it's bad for the environment and wears out the clothes.

WOOL

Some of our knitted products contain wool. Wool has the amazing capacity to self clean outdoors in fresh air, most effectively in damp weather under the cover of a roof. The preferred washing temperature for wool garments is 30 degrees (also called cold wash). Spin carefully. Don't tumble dry. Shape and line dry the garment after washing.

LINED SYNTHETICS & SHELLS WITH PROTECTIVE SURFACE

Air the garment after use. If it's dirty and/or sweaty — wash. Not washing a dirty garment can reduce its breathability. Always follow the care instructions. Line drying works okay but adding heat will reactivate the water-repellent surface of the outer fabric. Use a drying cabinet or iron on low heat.

It's important to re-impregnate your garment to maintain the surface's protective properties. This can be done either in the washing machine or with a spray. Remember to follow the instructions on the waterproofing and ensure that it's designed for breathing garments. It's important for all types of waterproofing to be exposed to heat after application, in order to maximize the effect.

JACKETS WITH DOWN FILLING

Don't wash down garments more than necessary. Often it's enough to clean the garment with a damp cloth. However, down garments can be washed as long as you do it the right way. Always follow the care instructions on the garment and use rather too little detergent than too much.

Down garments should be washed inside out and tumble-dried with tennis balls until they are completely dry.

Turn the garment inside out and make sure there's plenty of room for the jacket in the drum. To reduce wear, always close zippers, Velcro openings and buttons before washing. Choose a delicate cycle, 30° C or 40° C.

Place the washed jacket in a dryer along with three tennis balls. The balls help to distribute the down evenly and to regain its fluffiness. Dry the jacket on low temperature for as long as possible. You can help the down to spread evenly by removing the jacket every now and then, shaking it and loosen up any clumps.

The drying process usually takes longer than you think. Before you end the drying, make sure the jacket is completely dry, light and fluffy. Then hang your down garment on a hanger with lots of space around it.

It's possible to dry without a dryer, but it takes more work. You need a warm, well-ventilated room and have to shake the jacket frequently and thoroughly throughout the drying process to prevent the down from clumping.

Info

What does it mean?

ACRYLIC see Synthetic fibers.

BONDED FABRIC are two differnt layers of fabric combined into one.

CANVAS is an extremly heavy duty fabric, often made of

cotton. Used for making sails, bags, shoes and other funktions where sturdiness is required.

CVC (Chief Value Cotton) is a mix of high quality

cotton and polyester, where cotton is more

than 50%

EASY CARE is an expression that means easy to handle and

manage through time. The product has been treated mechanically or with chemicals to make ironing or pressing easier. The treatment will

fade away over time.

ELASTANE is a common name for a synthetic fiber known

for its exceptional elasticity. One of the most

famous is LYCRA®.

FLEECE is the common name for a soft fabric, usually

made of polyester. Have a short pile and the fabric is both warm and breathable.

GAUGE is the unit of measure that refers to the knitting

machines fineness size

INTERLOCK is a joined closely knit textile fabric, mostly

used as lining

COMBED COTTON is a soft version of cotton, a method where the

shorter fibres have been removed leaving the ${\bf f}$ ibres well paralleled. The yarn takes colouring

better, will get stronger and softer.

CARDED COTTON compared to combed cotton, this process is not as smooth, having more fibres "sticking

out" and is often a little bit rougher.

LYCRA® is a registrated brand from INVISTA, see Elastane.

MESH is a "net" looking textile, often used in the inside

of sport garments.

MICRO FLEECE is the same as fleece but with a shorter pile.

See fleece.

 $\textbf{OPEN END SPINNING} \qquad \text{is a technology for creating yarn without using} \\$

a spindle. It's not suitable for thin yarn.

PIQUÉ is a weaving style, normally used with cotton.

Characterized by raised parallel cords or fine

ribbing.

POLYAMIDES see Synthetic fibers.

POLYESTER is the most important fiber of all synthetic fibers,

see synthetic fibers.

PU is an abbreviation of Polyurethane, which is a

water resistant film (or coating) used for example

on outwear as jackets and bags.

REGENATE FIBRE is the name of art silk developed of the

 $cellulose\,fibre.\,Most\,common\,is\,viscose,\,modal$

and acetate

RIBBING is a pattern in which vertical stripes of stockinette

stitch alternative with vertical stripes of reverse stockinette stitch. It gives more elasticity.

 $\textbf{RINGSPUN FABRIC} \qquad \text{means of taking the rougher feel of raw cotton}$

and making it smoother to the touch. Essentially, the process for producing ringspun fabric involved using a spinning method, such as on a spinning wheel, to create a slightly finer thread.

RIP-STOP is a light-weight nylon fabric with inter-woven

ripstop reinforce ment threads in a crosshatch

pattern.

SINGLE JERSEY a fine fabric most often used to make t-shirts.

SOFT SHELL is a term used on soft materials with the ability

to block water partially, and comes with different degrees of water resistance and breath ability.

 $\textbf{SYNTHETIC FIBERS} \hspace{15mm} \text{is a collection name of all fibres that been} \\$

artifcial produced out of synthetic polymers. Most common is polyester, polyamides and

acrylic

TACTEL is a trademarked brand produced by Invista.

It has a cotton like feel.

T/C is a shortname for polyester/cotton mix, where

polvester makes ca 65%.

TWILL comes from a method of weaving textiles that

have a high wear and tear quality. Jeans, work wear and some shirts are often made from twill.

VISCOSE see regenerate fibres.

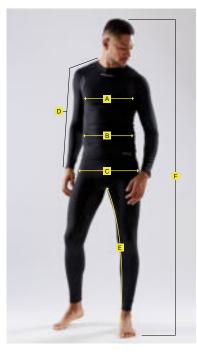

VELCRO® is a brand name of fabric hook-and-loop fasten

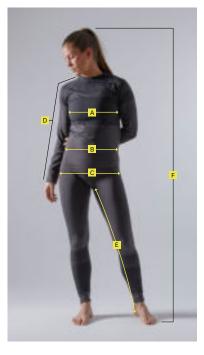

ers, but it's so well known that it has become the generic term for a type of product.

Sizing & measurements

Use the chart below to determine your size. If you're on the borderline between two sizes, order the smaller size for a tighter fit or the larger size for a looser fit. If your measurements for chest and waist correspond to two different suggested sizes, order the size indicated by your chest measurement.

How to measure yourself

MEN

WOMEN

A. CHEST

Wrap a tape measure evenly around the fullest part around the chest under your arms.

B. WAIST

Wrap a measure tape around your natural waistline.

C. SEAT

Standing with your feet together, measure around the fullest part of your hips.

D. SHOULDER AND SLEEVE LENGTH Measure from the lowest part of the neck, over the tip of the shoulder and down the outside of the arm, past the elbow and to the wrist. Keep the arm slightly bent.

E. INSIDE OF LEG

Standing with your feet together, measure from the crotch all the way down to the floor. Don't forget to stand as straight as possible. You may have to ask a friend to help you.

F. LENGTH

The total length of your body.

Footwear Size Chart

How to measure your feet

STEP 1
Stand up straight on a hard surface with your heel against the wall and a piece of blank paper taped to the floor.

STEP 2
Have someone mark the longest part of
your foot (referred to as heel-to-toe length) on the paper
with a pen or pencil, or measure yourself if necessary.
Repeat with the other foot, as sizes may be different on
left and right foot.

STEP 3
Use a ruler to measure the heel-to-toe length you marked for each foot.
